| Mitchell Mobley, Office/Buyer Registration | 205-454-6681 |

ABSENTEE BIDDING: Bid with confidence from the comfort of your home; simply call any member of Sale Staff or sale day phones. All phone bidders are required to register for a bidder number before the sale. Registration begins Friday afternoon.

TERMS & CONDITION: Terms of the sale are cash or check. Full settlement must be made to the sales clerk immediately following the conclusion of the sale and before any cattle will be released from the barn, unless prior arrangement has been made with seller or Mobley Livestock Marketing. Cattle sell under the suggested terms & conditions of the American Angus Association (www.Angus.org/pub/suggested_sale_terms.pdf)

UPDATES AND ANNOUNCEMENTS: A supplemental update sheet will be available sale day with complete and up to date information. Bulls scrotal circumference plus females breeding and calving reports will be provided. Any changes from any kind in the sale catalog or related materials will be announced from the auction block. Such announcements shall take precedence.

PURCHASER'S RISK: All animals are the owner's risk prior to their sale. Each animal will become the risk of the purchaser as soon as sold.

BIDDING: The auctioneer will settle any disputes as to bids, and his decision on such matters shall be final.

CERTIFICATE OF REGISTRY: A certificate of registry for each registered animal will be transferred to the buyer at seller's expense.

BREEDING GUARANTEE: All animals are guaranteed by the seller as outlined in the American Angus Association Suggested Sale Terms and Conditions.

HEALTH: Complete health certificates will be provided on all cattle for immediate interstate shipment. Sale Day Veterinarian: Dr. Bell with Barn Hollow Vet.

LIABILITIES: Anyone previewing the cattle and or attending the sale does so at their own risk. Neither Heart Of The Ozarks Angus Association, nor Mobley Livestock Marketing and associates, nor Ozark Regional Stockyards & associates, nor anyone connected with the sale will be held liable for injury, property loss or accident that may occur to attendees or to purchased animals. Mobley Livestock Marketing and its representatives acts as an agent only; agreement is between buyer and seller. The responsibility for sold animals passes to the buyer when sold by the auctioneer. Buyers are encouraged to purchase their own insurance on newly bought cattle.

LIVESTOCK MORTALITY INSURANCE: Insurance will be available on purchased cattle if desired. Ask Mobley Livestock Marketing associates for more information.

TRUCKING: Truckers believed to be reliable will be available to assist with shipping. Ask Mobley Livestock Marketing associates for more information.

SALE ACCOMMODATIONS:

Holiday Inn Express: 1301 Preacher Roe Blvd., West Plains, MO 417-257-3000. Ask for the Angus Sale Discount.

Hampton Inn: 1064 London Ln, West Plains, MO

FOOD & REFRESHMENTS: Lunch will be available, provided by Koshkonong FFA.

ANGUS MEDIA EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at www.angus.org and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusLinkSM, CAB®, Pathfinder®.

A Note from the Sale Manager

It is a pleasure to welcome you to the 2023 Heart Of The Ozarks Angus Association Spring Sale. I'm excited to be working with this group of consignors offering a tremendous set of Angus bulls and females.

As you look through this catalog you will see that the majority of these bulls are sons of current top sires and/or dams of the Angus breed, providing you with superior Angus genetics that will increase your herd production and value. All bulls selling in this sale will have a current semen test, trich test, breeding soundness exam (BSE).

Be sure to take note of the excellent set of spring and fall calving females, plus this outstanding set of bred and open heifers. These are Angus females that will make a difference in your herd.

All cattle will have genomic-enhanced expected progeny differences (GE-EPDs), allowing for increased accuracy, so you can buy with more confidence. Now is the time to purchase the Angus cattle that will keep your cattle operation at the forefront of the beef industry.

Come early Friday afternoon and/or Saturday morning and view the sale offering. I encourage you to contact these Angus breeders to learn more about their Angus bull and female offering.

I look forward to seeing you at the 2023 Heart Of The Ozarks Angus Association Spring Sale.

Please contact me if I can be of any assistance.

Thank You!
Luke Mobley

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef*® brand.

Only 1 in 4 non-parent Angus bulls qualify.

Minimum Genetic Requirements

| | |
|---------------------------------|-------|
| Marbling EPD (Marb) | +0.65 |
| Dollar Grid Carcass Index (\$G) | +55.0 |

Consigned by: Wiles Ridge Ranch
 Powerhouse son of the ORigen AI sire, DNAMite. His dam is a very productive cow that has been flushed four times. This bull is an outstanding combination of calving ease, growth, maternal, and carcass traits. Note he is Show-Me-Select qualified. He is in the Top 1% of the breed for WW EPD, Top 1% of the breed for YW EPD, Top 1% of the breed for RADG EPD, Top 4% of the breed for MILK EPD, Top 1% of the breed for CW EPD, Top 1% of the breed for RE EPD, and Top 1% of the breed for \$BEEF and \$COMBINED. He is the only bull in the breed with his combination of CED, BW, WW, YW, RADG, SC, MILK, RE, and \$C.

 BW 75, Adj. WW 716, Adj. YW 1214. If you are looking for an individual with some of the top carcass & dollar values to add to your herd, this may be the bull you're looking for. All of his carcass & dollar values are at the top part of the breed. He also has outstanding growth to go along with it. He is an outstanding individual to go along with the numbers he represents. Ashland sons are very much in high demand, and we think 2185 will represent himself very well.

Consigned by: Wiles Ridge Ranch
 Balanced son of the ABS AI sire, Northside. This is an embryo son of our favorite ZEUS daughter. Unfortunately, he had a slow start as his 12-year-old recipient dam lost three of her quarters as she was raising him. As you will see, he has done an excellent job of catching up since he was weaned. Note he is Show-Me-Select qualified. He is in the Top 15% of the breed for WW EPD, Top 15% of the breed for YW EPD, Top 10% of the breed for RADG EPD, Top 1% of the breed for MILK EPD, Top 2% of the breed for \$WEANING, and Top 15% of the breed for \$BEEF. His embryo dam is a powerful and wonderful milking cow.

- A08 is a direct daughter of the ABS sire, PA Safeguard. We retained four outstanding daughters that are doing an excellent job. A08 was our foundation cow. Her first calf was a bull that sold off the farm at 13 months of age for \$3,500. A08 goes back seven generations of AI breeding. This cow is very youthful in her phenotype. She is a good milk producer and breeds back AI every time. She was AI bred on 12/06/2022 to the new powerhouse ABS stud, TAR Dominance 0031. A08 has a really good ABS bull calf on the side that was born on 09/02/2022, with a BW 64, Tattoo 325. This calf sells as a donor calf from cow #840 (Reg# 19469353).

Proud Sponsor
of MO BEEF
KIDS.
"More Beef.
More Often."

Produce top-quality hay all season.

Disc Mowers

Round Balers

Reach a whole new level of hay production.

Increase your hay production with our selection of Hesston by Massey Ferguson[®] hay equipment. Our round balers and small square balers are built for producers looking to upgrade their baling with higher capacity, faster speeds and industry-leading bale density. And our durable disc mowers provide you with smooth, reliable cutting, even in steep ditches and tangled hay fields.

We now carry a full line of Massey Ferguson[®] and Hesston[®] hay equipment and parts!

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

- Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs
- Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)
- The ability to make more rapid progress for traits that are important to you, due to:
 - more accurate selection
 - easier identification of genetic outliers
 - the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8-33 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation at www.angus.org.

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50k by partner Zoetis.

This attractive, deep-bodied, thick-made sire was a Midland Bull Test graduate with a ADG Ratio of 108 and overall test index of 105 and had a Birth Weight of 68 lbs. to Ratio 82, an Adj. 205-day weight 828 lbs. to Ratio 118, and an Adj. 365-day weight of 1,210 lbs. to Ratio 114. His Pathfinder Dam, Assured Juanada D 58 LLR, has four progeny with an average Weaning Ratio of 113.

Thank you for your support.

YOU'VE EARNED IT

You've made a significant investment in your genetics, but does the market recognize that? The AngusLinkSM Genetic Merit Scorecard was created to objectively describe the genetic merit of your feeder calves. The scorecard gives buyers the confidence they need to pay more for your quality calves.

In 2022, users of the Genetic Merit Scorecard earned a **\$12.94/CWT PREMIUM** on average. Give us a call and we can help you earn what you deserve.

ANGUS
USA

American Angus Association Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I"; and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Dockility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable dockility in a sire's offspring compared to another sire.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

FOOT SCORE

Claw Set (Claw), is expressed in units of claw-set score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal claw set, which is toes that are symmetrical, even and appropriately spaced.

Foot Angle (Angle), is expressed in units of foot-angle score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal foot angle, which is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass traits where the units of measure are in trait format and analyzed on an age-constant basis.

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, reported in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. Increased selection pressure on \$W increases weaning and maternal milk traits while increasing mature cow size.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals. Components for computing \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase, and market these animals on a quality-based carcass grid.
